

Lifting beam in composite

Advantages:

- Low weight compared to steel
- Requires less crane capacity than lifting beams in other materials
- Can be adjusted according to customers' demands

Qualities:

- Lifts 2x2x2,5 ton WLL / 5 ton total
- Weight: 828kg
- Has four attachment points spread out on 11 meters length
- Adjustable attachment points on lifting beam for balancing the load
- Variable counterweights for balancing the lifting beam
- Designed according to EN 13155:2003 and DNV-OS-C501:2013
- CE marked
